Actions from last site visit:

- Temporarily stored plant relocated to Lufkins Farm second reservoir site.

Inspection Results Summary:

- Plant not operational during time of visit. Plant in the process of being partly dismantled to be used at the new Lufkins Farm site.
- Some oversize stored on site in western storage area and used when needed.
- New slider doors installed on one of the outbuildings in preparation for when the site is handed back to the landowner.
- Former site office has been removed. Only small office now remains.
- Haul road condition was acceptable – site foreman reported no complaints since second Lufkins Farm operation was approved.
- Speed limit signs maintained on haul road.
- Concrete batching plant operating – quite busy with haulage as having to still import materials to feed plant. A few mixers onsite at time of visit.
- ROMP (review of old mineral permission) is due November 2025. An application will need to be submitted (or postponement application). Formal letter with full instructions will be sent in due course.

Permission under 2017 EIA regulations?:

- Yes / **No**

Actions to be taken before next site visit:

- Continue maintenance of site and access road.

Note: The actions noted in this report are required in order to ensure adequate progress is made and to avoid potential enforcement action against a breach of planning control.
