

Site monitoring report

Please find detailed below the report for the site monitoring undertaken on 10th October 2024.

Site Name: Barling Landfill, Southend Road, Barling Magna
File Ref: 34 421 15
Operator: Enovert
Visit no: 1
Monitoring Officer: Tom McCarthy **Tel No:** 03330 320943

Permissions:

ESS/31/99/ROC: Installation of plant and machinery within a compound to utilise landfill gas for electricity generation
ESS/36/05/ROC: Permanent installation of LFG flare within existing LFG generation plant
ESS/51/08/ROC: Review of Old Planning Permission (ROMP) application for permission reference ROC/634/90
ESS/11/09/ROC: New portable building for use as a manager's office and meeting room in substitution for a permission for two new separate buildings
ESS/29/10/ROC: Security compound
ESS/47/10/ROC: Increased surcharging on part of site
ESS/38/16/ROC: Extension of time to surcharging permission together with some changes to previously approved restoration scheme

Constraints:

Weather:	Dry / Windy / Rain / Snow
Noise:	Acceptable / Not acceptable / N/A
Approach roads:	Dry / Dusty / Wet / Muddy / Flooded
Ground:	Dry / Dusty / Wet / Damp / Muddy / Flooded
Access:	Obstructed / Not obstructed
Wheel cleaning:	Washer / Spinner / Sweeper / None
Hose:	In use / Not in Use
Machinery:	Working / Not Working
Stockpiles:	Height = Various
Bunds:	Profiled / Grassed / Weeds / Soil

Inspection results summary:

An area to the north of cell 1 remains to be restored (soiled and profiled) however the operator is hopeful that this work will be able to be finished this year, before the weather gets too bad and access to this part of the site becomes problematic. Once this work is complete the northern part of the site would be fully restored and would be able to put into agricultural use/aftercare.

Imported material, as detailed in the last monitoring report, is currently being deposited in areas 5a and 6a. As per the approved phasing the southern part of the site will be worked west to east, with the central haul road removed as part of the last phase. Depending on

how wet the winter is, the operator may use the aforementioned areas as a bit of a stockpiling area and then as the weather breaks this material would simply be spread further east to level.

It is understood that the operator is in discussions with the Environment Agency with regard to leachate levels from the landfill and that some optioneering in this regard is currently being undertaken. It was suggested that one option being considered was a treatment plant to which it was acknowledged planning permission would be required.

Compliance with conditions:

On-going requirements:

- Noise monitoring (condition 27 of ESS/51/08/ROC and condition 26 of ESS/38/16/ROC)
